Sew yourself: Easy poncho jacket

Materials

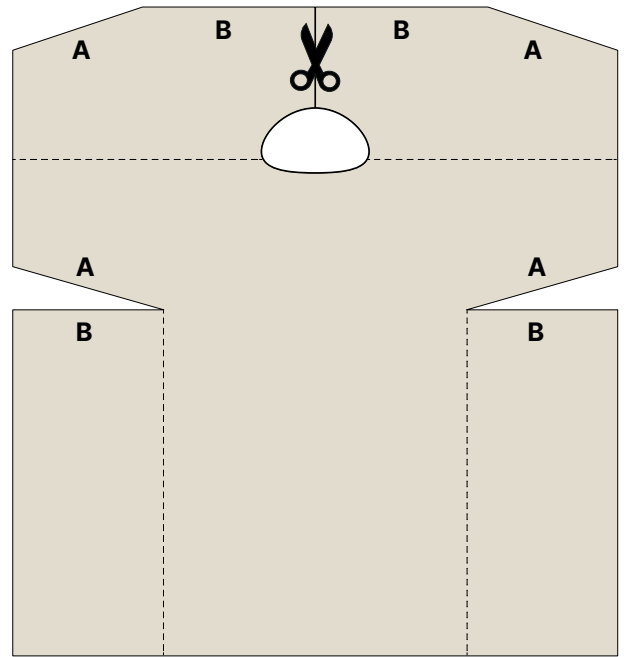

- Polar fleece 140 cm

Pssst ... You can make the poncho shorter and longer as desired. However, remember that this will of course change the fabric use.

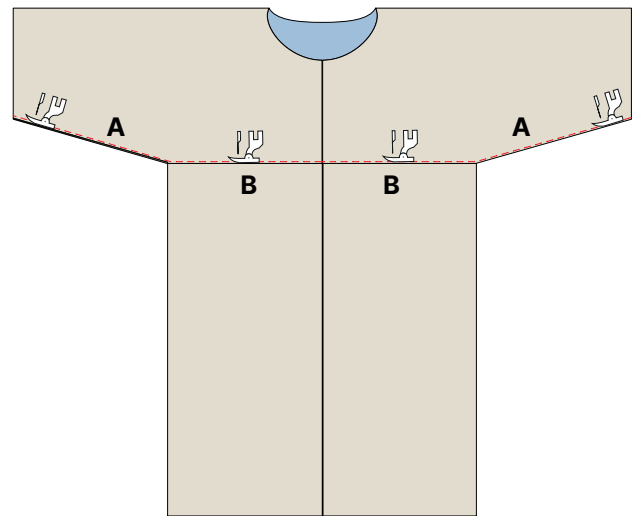

1. Fold the fabric in half. Draw as shown in the drawing. Find the template for the neck opening on the first page. Cut away the pieces marked in blue.

2. Lay the fabric flat and cut the opening from the neck. Then fold the fabric as the dotted lines show - right side to right side.

3. Sew sleeve seam and front seam from wrong side with 1 cm seam allowance. Turn right side out.
