

Mobile star patchwork

FREE
DIY

Material

- Patchwork fabric
- Wooden ring
- Beads
- Leather string
- Fibre filling

1. Cut the star templet and place it on the fabric.

2. Cut 10 stars. Stitch them together wrong side against wrong side with zig-zag stitching. Fill the stars with a little fibre filling before finishing the stitching.

3. Make 4 strings in leather, in different lengths and tie them together in the top. Tie the 4 strings to the wooden ring about 24 cm down the length of the strings.

4. Place pearls on the strings and tie a knot under the pearls to hold them in place. Place the stars on the strings at different lengths. See the picture.
