

# FLEECE BLANKET WITH BRAIDED EDGES

## MATERIALS

- Fleece (measurements as desired)
- Sewing needle
- Thread
- Scissors
- Tape measure

*Tip: You can choose to braid your blanket only on two edges. Do not round the corners. Cut a fringe on two edges only.*

**1.** Round all the corners if you want to make fringes on all four edges of the blanket.

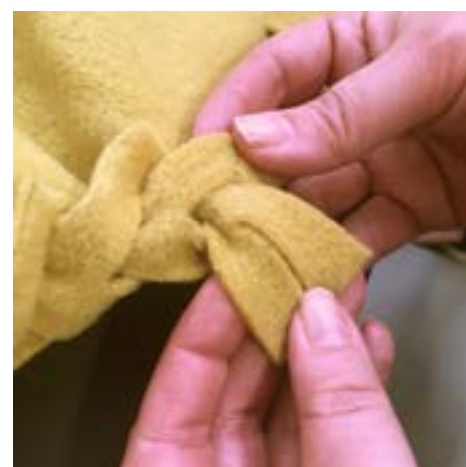

**2.** Cut fringes all around the edge. Cut the fringes approx. 3 cm wide and approx. 4-5 cm deep.

**3.** Fold each fringe in half. Cut a slit in each fringe (see picture).

**4.** Pull each fringe through the next. Repeat all the way around the blanket to create a braided edge.

**5.** To finish and prevent the braid from unravelling, tuck away the last fringe and stitch securely into place.
