

MOBILE WITH METAL RINGS

MATERIALS

- Felt 0.25 x 0.90 m
- Large metal ring
- Small metal ring
- Strong thread (e.g. denim or furniture thread)
- Fibre filling
- Iron-on transfer (e.g. rainbow print or similar)
- Textile glue

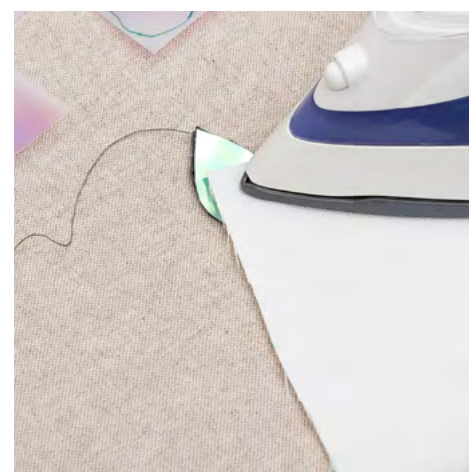

1. Cut out templates. Draw around them on the felt. Cut clouds and raindrops.

2. Dab textile glue onto the raindrops. Affix a length of thread at approx. 2 cm. from the edge. Assemble raindrops with glue.

3. Using a zigzag stitch, sew the clouds together on the right side. Leave a small gap open in each cloud. Stuff with fibre filling. Then close the gap with zigzag stitching.

4. Using the template, draw the droplets onto the iron-on transfer. Cut them out. Iron them on. Follow the instructions on the iron-on transfer sheet. Sew all the parts together using needle and thread.
