

FRIED EGG OVEN CLOTHS

FREE
DIY

MATERIALS

- Egg white fabric 25 cm
- Egg yolk fabric remnant
- Thermolam 25 cm
- Bias tape for edging 150 cm
- Tape to make strap 30 cm
- Fibre filling

*By the way... Also a great idea
for a child's play kitchen*

Cut 4 x egg whites using the template.
Cut 4 x Thermolam using the template.
Cut 4 x egg yolks using the template.

- Place the yolk on top of the egg white with a layer of Thermolam between them.
- Sew the yolk along the raw edge. Sew almost all the way around. Leave the needle in the fabric and fill a little fibre filling into the yolk. Continue around the edge and into a spiral - see template.
- Place two eggs back to back. Stitch 0.3 cm from the edge through all layers and all around the edge. Overlock/zig zag around the edge to squeeze the seams flatter.
- Hand- or machine-sew long quilt stitches around the egg white - see template.
- Cut 2 x 15 cm tape for the strap. Fold the tape in half, place it on the back of the egg white and sew a row of stitching 0.3 cm from the edge - see template.

Attach bias tape:

- Cut 2 x 75 cm bias tape. Unfold the bias tape. Pin it to the edge along one side of the egg white. The bias tape should extend about 1 mm over the fabric edge - see figure 1.
- Start sewing along the fold about 3 cm from the end of the bias tape. Sew nearly all the way around. Leave a 6 cm gap - see figure 2.
- Cut the bias tape so that there is a 2 cm overlap - see figure 3.
- Sew the ends of the bias tape together, iron the seam flat - see figure 4.
- Sew the remaining 6 cm of the bias tape - see figure 5.
- Fold the bias tape band and sew it to the other side - see figure 6.
