

FINGER RING

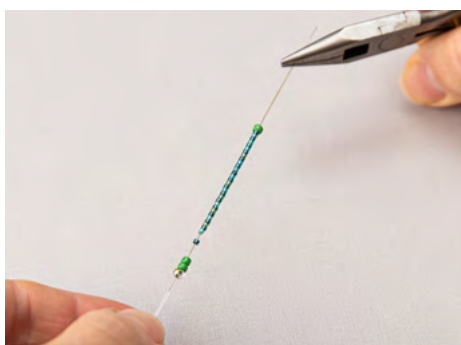

MATERIALS

- Round elastic
- Beads of your choice
- Beading needle (here we used item no. 20987)
- Jewellery glue (available from our stores, not online)

Hey! To make beading easier, use a beading needle and two strands of wire.

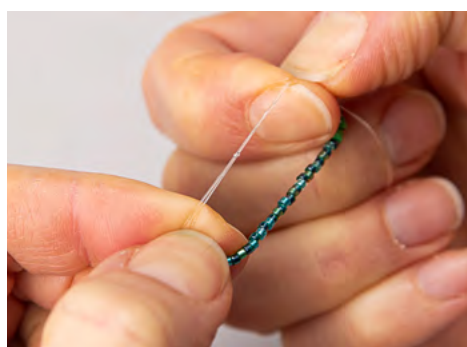

1. Slide all the beads you need to make the ring onto the long beading needle. To conceal the knot, start and finish with a bead that has a larger hole.

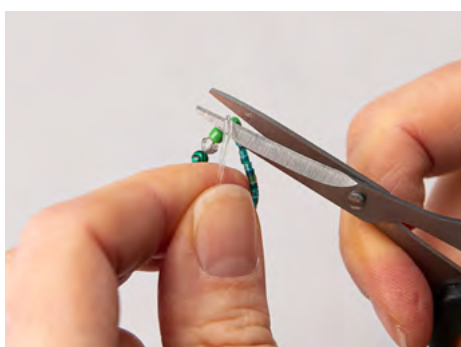

2. Pull the beads from the needle onto the elastic. If using small beads, use a pliers to hold the needle.

3. Tie a reef knot, pull taut and then tie an extra knot.

4. Tighten the knot.

5. Cut elastic ends.

6. Dab a little glue on the knot. To conceal the knot, push it inside a large-holed bead.
