

MAKE PERSONAL JEWELLERY

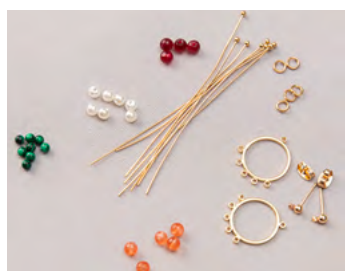

BEADED EARRING

MATERIALS

- Ear rings with eyes
- Ear posts
- Jewellery pins
- O-rings
- Beads of your choice
- Set of pliers (here we used item no. 74401)

Hey! It is important that you use the right tools. Our pliers set contains everything you need; round nose pliers, flat nose pliers and a wire cutter.

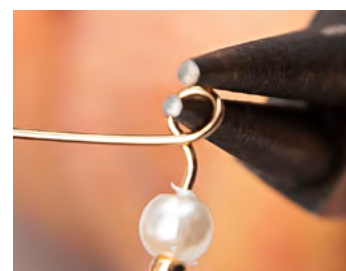

1. Make sure you have everything you need.

2. Set a bead on a jewellery pin and bend the end of the jewellery pin away from you.

3. Now move the pliers so that the pincers bite at the top of the pin above the bend.

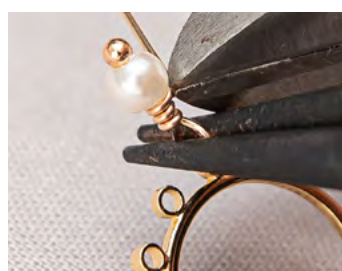

4. Shape an eye.

5. Set the bead in the eye of the earring.

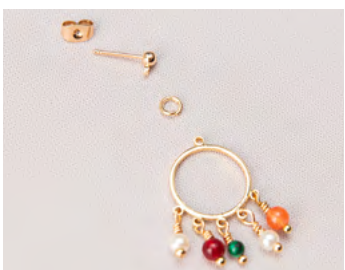

6. Wrap 3 twists above the bead. Use round nose pliers to hold the earring and flat nose pliers to wrap with.

7. Cut off excess length of jewellery pin.

8. Squeeze on the cut tip.

9. Mount beads in all the eyes.

10. To assemble the earring, join the ear post using an O-ring.
