

CREATIVE ART WITH FABRIC BOOSTER

**MATERIALS**

- Fabrics, e.g. cotton canvas
- Fabric Booster item no. 29915
- Textile glue no. 29901
- Staple gun
- Staples 8 mm
- MDF fibreboard 12 mm (cut to desired dimensions)
- Scissors
- Foam brush

**FREE
DIY**

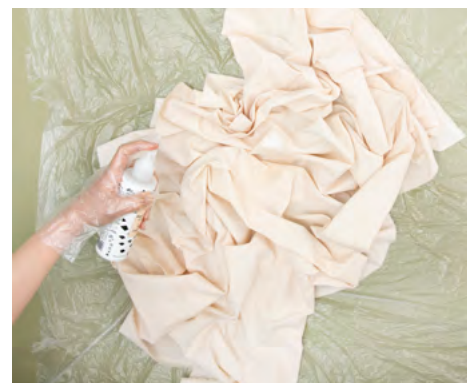

Hint: We recommend lightweight fabrics containing cotton and flax

1. Cut the fibreboard to the desired dimensions. Here we used 12 mm MDF fibreboard measuring 50 cm x 90 cm. Iron the fabric.
NB: Do not wash the fabric before use.

2. Cover the fibreboard with fabric. To ensure that the board is completely concealed, use a double layer of a light fabric. Your background is now ready.

3. Decorative fabric: Press the fabric. Lay out a sheet of plastic or similar underlay to work on. Crush the fabric diagonally into hand-sized balls to cover your project. Shake the spray bottle and spray onto the entire length of crushed fabric. The fabric should be drenched with adhesive. Here we used about half a bottle. Leave to dry for about 5-6 hours or overnight.

4. Place the dry crushed fabric onto the board. Adjust to fit. Glue the fabric onto the board. Start in one corner. Leave to dry and it's ready for hanging.

5. Fabric booster can also be used in other ways, e.g. to make a lamp base cover. Sew a tube of fabric. Spray with Fabric Booster. Shape and leave to dry e.g. on a bottle.
