

FROM CARDBOARD BOX TO AQUARIUM

**MATERIALS:**

- Template (page 2)
- Used cardboard boxes and packaging
- Various beads, sequins, bubble wrap, leftovers of yarn, eyes, Pap Fab, gift wrapping, fabric remnants, foil, etc.
- Marker pen, brush and power tape
- Glue gun, glue stick refills
- Cutting mat and hobby knife
- MUCKI finger paint

By the way... "Upcycling" means recycling something that you would otherwise have thrown out and making it into something new

**GRATIS
DIY**

1. Collect all your materials and print the template. Here we have used remnants and leftovers in cerise, pink, white, silver and bluish shades.

2. Cut out the templates (use scissors or a hobby knife). Draw around them on cardboard and cut them out. Hint: If you wish, you can scale the templates to other sizes.

3. Decorate your designs as you wish. If you decide to wrap them in leftover yarn, stick power tape on one side.

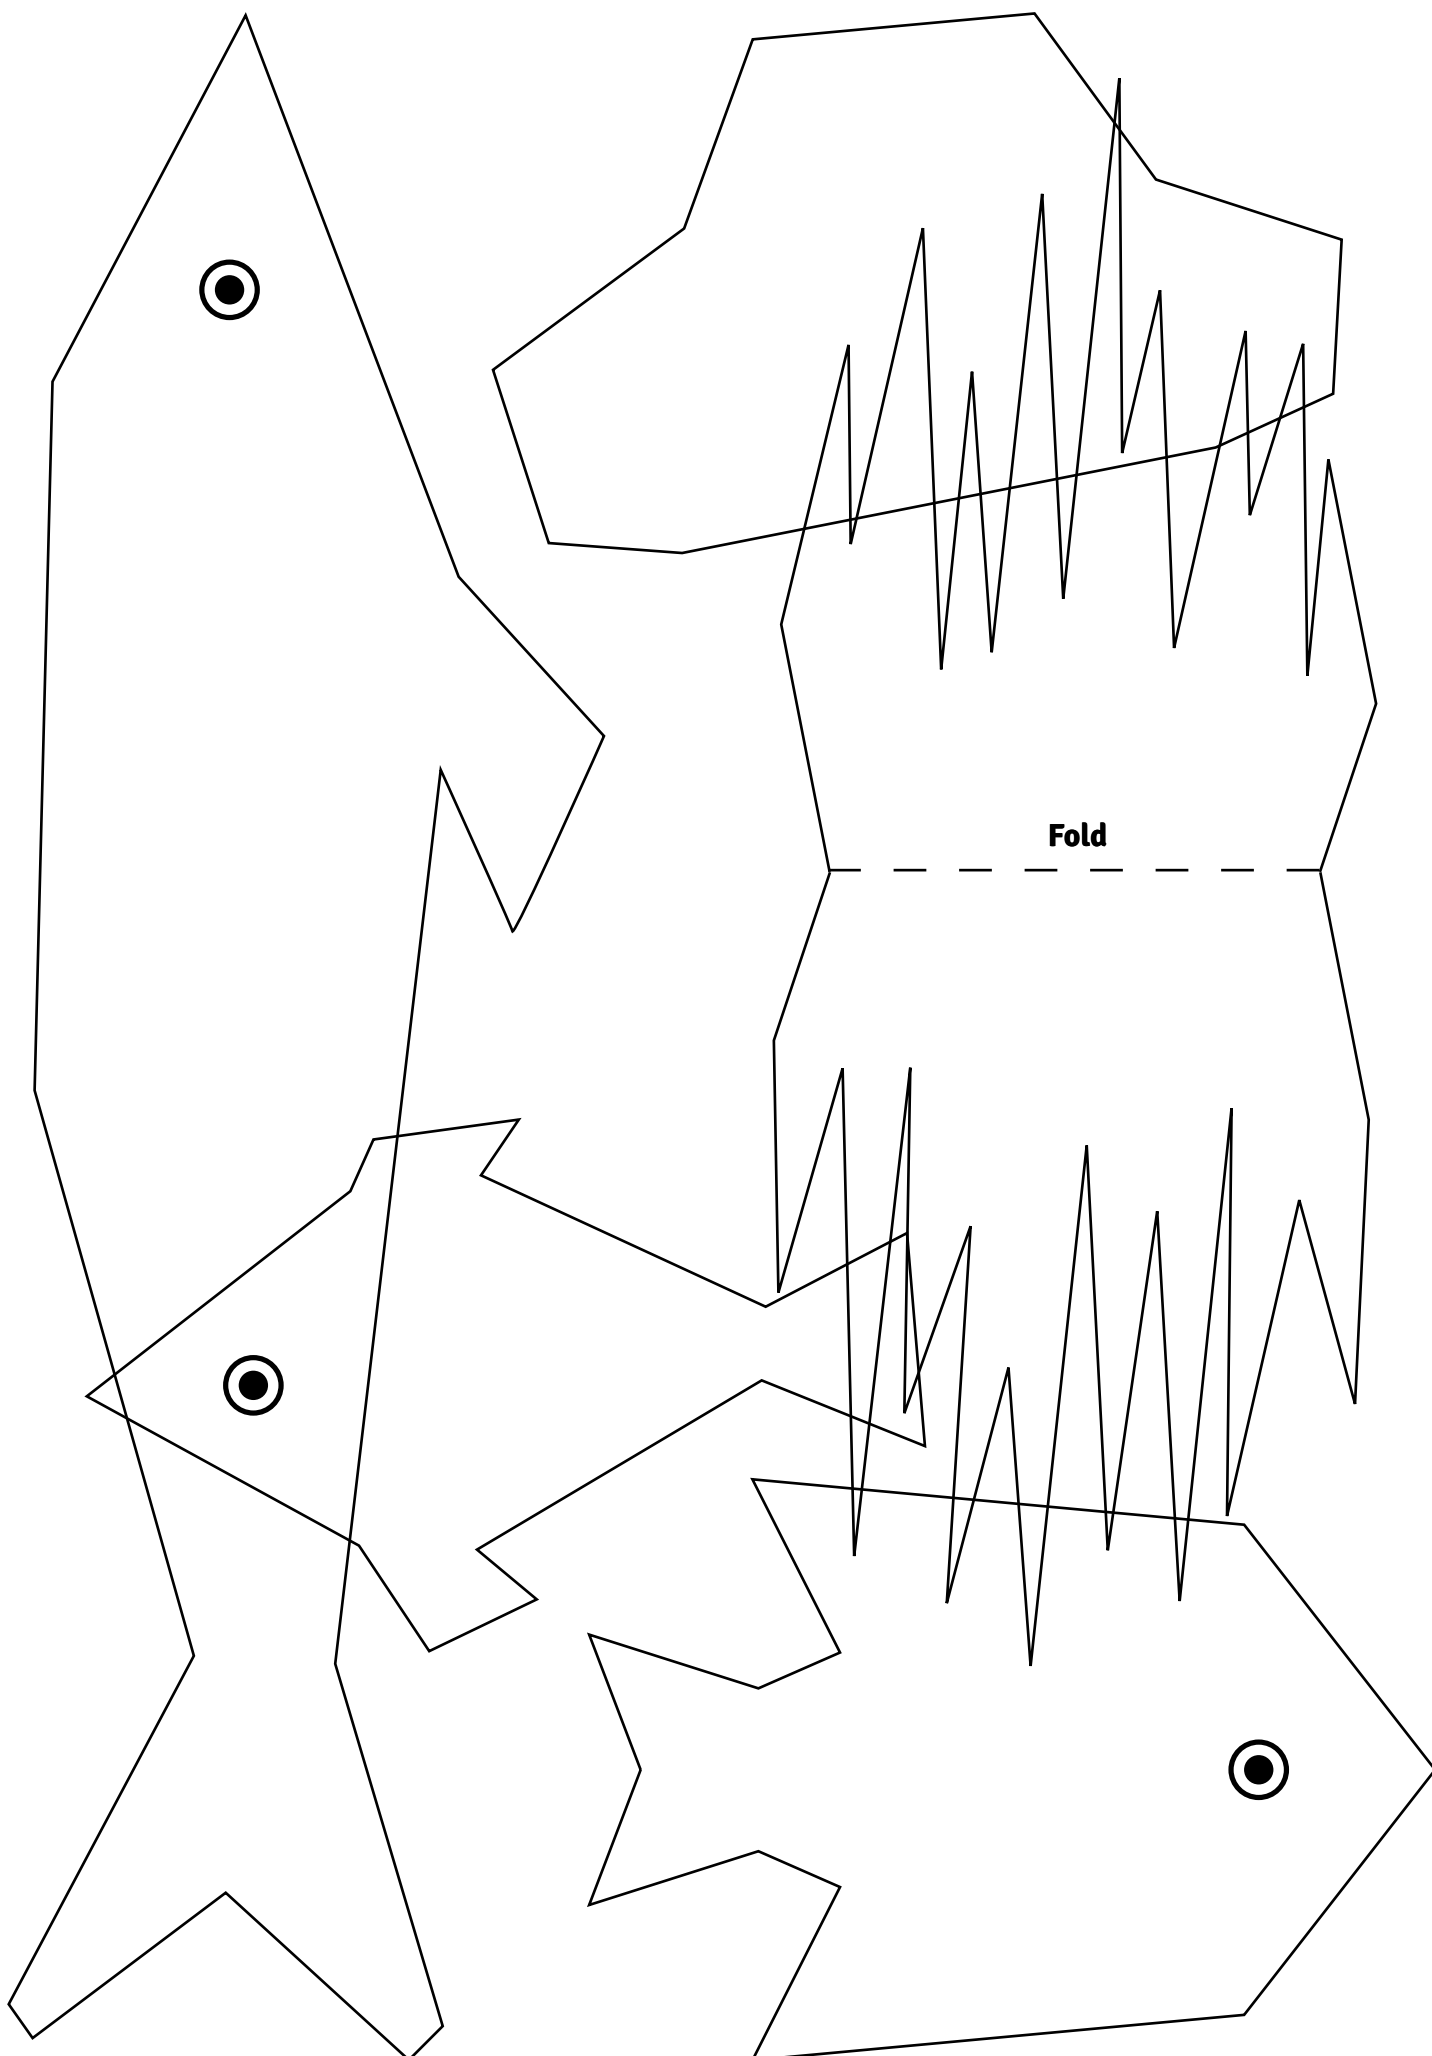

4. Wrap the yarn tightly around the template. Use a glue gun to seal the ends.

5. Make a hole for the eye. You can use a button or a plastic lid as an eye. Glue the eye to the hole using the glue gun.

6. Decorate the cardboard box. Our cardboard box measures 40 x 45 cm and is 17 cm deep. If you wish, you can draw seagrass etc. with a marker pen. Glue all your motifs firmly using the glue gun. You can glue some motifs to a piece of cardboard or wooden stick first. The base is made of blue tulle and plastic, and the seagrass is made of Pap Fab.
