- Fabrics, luxury cotton canvas, linen, linen/cotton
- Marker pen
- Atomiser with water

**FREE
DIY**

By the way... You can make needle felting motifs in all kinds of shapes, colours and patterns

1. Make sure you have all the materials you need.

2. Draw your motif up on the back of the fabric. Use a marker pen.

3. Tear off small tufts of carded wool. Place these inside the marker lines. Place the needle felting brush beneath the fabric. Bring the felting needle holder with 7 needles up and down through the wool and fabric. Stretch out the wool before raising and lowering the needles when you reach a marked line. Hint: You can mix two colours of wool. Blend small tufts and work them together.

4. Repeat with the next colour. You will need to felt several layers to fill in all the spaces. Check your progress on the right side under way. As needles can break, it's good to have extra needles at hand.

5. To remove the marker lines, spray with water from an atomiser bottle. We do not recommend that you wash needle felting projects.
