

Batik Idea No. 3

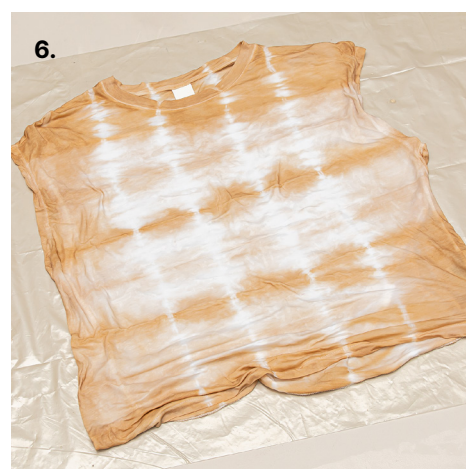

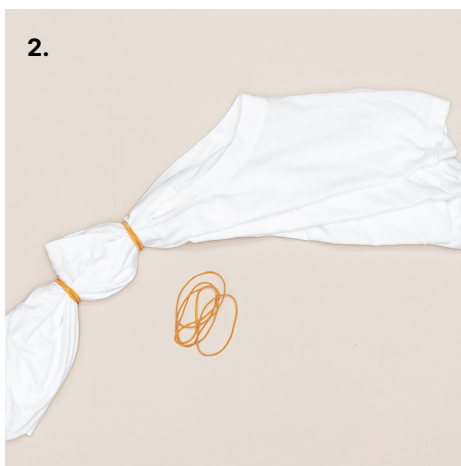

Materials

- Batik colours
- Fixing agent for batik dye
- Rubber bands

4 FACTS ABOUT BATIK

- ▶ The project you wish to dye must be freshly laundered (and still wet)
- ▶ Mix the batik dye with water (follow the instructions)
- ▶ Leave your project to soak for one hour in the dye bath/with the batik dye before rinsing
- ▶ Finally, use fixative to fix the batik dye

Here you pleat your project, folding it like an origami paper chain. Secure with rubber bands. Then you immerse your project in a bowl of mixed batik dye and leave to soak. When you cut off the elastic bands, a unique pattern appears.
