CONSTRUCTION

This sweater is worked top-down. Begin with the neckline (contrast colour), make the raglan increases, and then separate for the sleeves. Crochet the rest of the body before making the sleeves. The sleeves are sprinkled with bobbles worked in a contrast colour. All rib edges are made with the same contrast colour and are worked seamlessly onto the sweater.

When not using the contrast colour, carry it on the wrong side. Make sure to catch your floats between the bobbles to avoid annoying long floats on the inside and visible strands on the outside.

The main pattern consists of alternating rows of double and treble crochet. Rows with double crochets are worked from the right side, rows with treble crochet from the wrong side.

Both body and sleeves are worked in rows, ending with a slip stitch in the first stitch of the row.

Turn with 1 chain stitch when about to work double crochets and 2 chain stitches when about to work treble crochets. Begin in the 2nd stitch, and work the last stitch in the stitch at the bottom of the chain stitches.
